## Definitions

**Visible Light** - Most common technology, used with standard direct thermal chemistry.

**Near IR** - DYes added to absorb light at 670 - 700 nm. Designed to filter out minor amounts of contaminants. Used in the Parcel Tracking Industry.

**Direct Thermal Economy** - Partially topcoated, medium sensitivity direct thermal. Excellent environmental resistance, especially plasticizer resistance. The adhesive is a permanent acrylic adhesive, the same as our premium direct thermal product. Excellent image quality. The difference between our Premium and Economy direct thermal is that the Economy product has a partial topcoating. Be sure to test the Economy product if your application requires more environmental resistance.
